Stages of Development

Milestone 1 (5/5): Complete necessary class headers and source files.

- Implement necessary class functions as well as getters and setters for members.

Milestone 2 (5/7): Complete demo to show functioning pick up, drop off, and request system.

- Implement LinkedList, Queue, and Binary Tree to System.cpp

Milestone 3 (5/9): Complete command line interface to make new requests, demo ui.

- Implement Controller.cpp to interface with System.cpp

Milestone 4 (5/11): Practice presentation and check for edge cases.
